The healthcare solutions consultancy team at Chantrey Vellacott DFK has been supporting healthcare organisations for over ten years working in both the public and not for profit arenas.

Since 2005 the focus has been very much on supporting aspirant foundation trusts to achieve their goal to become fit for purpose as autonomous organisations; supporting strategic health authorities with assessments of the state of readiness of applicant trusts and the level of board and senior team capability; and supporting primary care trusts to achieve strategic change, especially around transfers of community services and creation of new organisations.

With a team that is made up of experienced former board directors from both the NHS, private healthcare and local government, all our support and advice is grounded in real experience which gives a unique edge to our approach and the scope of our service portfolio.

Our key aims

Our key aims are to help healthcare organisations to achieve structured change and become fit for purpose in either their existing or new form.

Key elements of our business solutions support involve board capability and leadership, risk management, governance and assurance systems and processes, performance management frameworks and business intelligence systems.

During transition the same exacting standards around quality of services, governance and finance will continue to need to be met at all stages of the process

and we aim to give support and advice which provides Boards with realistic implementable solutions, to become more effective organisations.

Benefits to our clients

We ensure our support dovetails with our clients' strategic objectives, and we tailor our support accordingly.

By freeing up senior time to concentrate on operational priorities our focussed and time limited support works across the organisation to identify, develop and recommend options for change and new ways of working.

We provide Boards with assurance of the robustness of their plans, operations and governance structures.

Ultimately our goal is ensuring our clients' organisations have the foundations for good leadership, are well governed and are risk assured.

Our service portfolio
